WESM Rules Retail Rules

Market Manual: WESM Manual on Dispatch Protocol Issue 22.1

Topic: Validation Process of Reported Discrepancies in the Dispatch
Instruction Report

Proposed Classification of Amendments (please tick the box):

General Minor Urgent

If Urgent, reason for urgency:

III. SUMMARY OF THE PROPOSED RULES CHANGE

The amendments to the WESM Rules and Manuals on Dispatch Protocol are proposed to enhance the validation process of reported discrepancies in the Dispatch Instruction Report and amend the prescribed timeline to provide the System Operator, Market Operator and Generator Companies a sufficient period to assess and validate reported discrepancies thoroughly.

IV. BACKGROUND

Section 14 of the WESM Manual on Dispatch Protocol provides for the validation process of reported discrepancies in the Dispatch Instruction Report. Under this section, the Market Operator is mandated to publish the Dispatch Instruction Report in the market information website no later than one (1) week from the relevant trading day. Each Generation Company shall then validate all the data in the Dispatch Instruction Report as published by the Market Operator and any discrepancy in these reports shall be reported by the Generation Company to the Market Operator within two (2) weeks after publication. Failure by the Generation Company to report to the Market Operator any discrepancy within the period defined shall render the data in the report as final.

Within two (2) working days from receipt of a report, the Market Operator shall request the System Operator to validate a reported discrepancy by a generator.

In order to prepare and submit the validation in a timely manner, the WESM Manual on Dispatch Protocol Issue 21.0 requires the System Operator to perform reconciliation with the Generation Company and provide the results of its validation of the reported discrepancies within seven (7) working days from the receipt of the request from the MO. If the Market Operator has not received any validation within the prescribed timeline, the published data from the DIR shall be maintained. If the Generation Company claims additional compensation related to the reported discrepancies that were not validated within the prescribed timeline, the Generation Company may subject the said claim under the WESM dispute resolution process.

During actual operations, the System Operator is able to comply with the prescribed validation timeline. However, there were instances where Generator requested for further validation of the validated discrepancy claims submitted by the System Operator to the Market Operator. Section 14 of the WESM Manual does not provide for the revalidation process.

V. THE PROPOSED RULES CHANGE

To address the concerns raised above, the following changes are proposed to the validation process of Post Dispatch Reports provided under the WESM Manual on Dispatch Protocol Issue 21.0:

No.	Concern	Proposed Change
1	WESM Manual on Dispatch Protocol does not provide for the revalidation process of discrepancy claims submitted by the System Operator to the Market Operator	Include a provision for the revalidation of discrepancy claims and provide the System Operator an additional (7) working days for such process.

VI. BACKGROUND AND DESCRIPTION OF THE PROPONENT

The proponent is the National Grid Corporation of the Philippines as the System Operator.

VII. CONCLUSIONS AND RECOMMENDATIONS

The amendments to the WESM Manual on Dispatch Protocol shall enhance the process of Dispatch Instruction Report discrepancy validation by including a provision for revalidation of

discrepancy claims, providing the System Operator, Market Operator and Generator Companies sufficient period to verify the data published in the Dispatch Instruction Report.

It is recommended that the proposed changes be adopted.
