### ATTENDEES

	Name	Designation/Position	Department/Company
1	Maila Lourdes G. De Castro	Chairperson, Independent	RCC
2	Francisco L.R. Castro, Jr.	Member, Independent	RCC
3	Allan C. Nerves	Member, Independent	RCC
4	Concepcion I. Tanglao	Member, Independent	RCC
5	Dixie Anthony R. Banzon	Member, Generation Sector	RCC
6	Cherry A. Javier	Member, Generation Sector	RCC
7	Carlito C. Claudio	Member, Generation Sector	RCC
8	Jessie Victorio	Member (Alternate), Generation Sector	RCC
9	Mark Habana	Member, Generation Sector	RCC
10	Michelle Tuazon	Member (Alternate), Generation Sector	RCC
11	Ryan S. Morales	Member, Distribution Sector	RCC
12	Ricardo G. Gumalal	Member, Distribution Sector	RCC
13	Nelson M. Dela Cruz	Member, Distribution Sector	RCC
14	Virgilio Fortich, Jr.	Member, Distribution Sector	RCC
15	Getulio Z. Crodua	Member (Alternate), Distribution Sector	RCC
16	Lorreto H. Rivera	Member, Supply Sector	RCC
17	Ambrocio R. Rosales	Member, System Operator	RCC
18	Isidro E. Cacho, Jr.	Member, Market Operator	RCC
19	Karen A. Varquez	RCC Secretariat	PEMC
20	Divine Gayle C. Cruz	RCC Secretariat	PEMC
21	Dianne L. De Guzman	RCC Secretariat	PEMC
22	Kathleen R. Estigoy	RCC Secretariat	PEMC
23	Ma. Hazel M. Gubaton-Lopez	Proponent	PEMC
24	Geraldine A. Rodriguez	Proponent	PEMC
25	Sheryll M. Dy	Proponent	IEMOP
26	Julius Eleazar A. Bunyi	Proponent	IEMOP
27	Edward I. Olmedo	Proponent	IEMOP
28	Valfia U. Gregorio	Proponent	IEMOP
29	Jenny I. Jalandoni	Proponent	IEMOP
30	Melanie C. Papa	Observer	DOE
31	Mari Josephine C. Enriquez	Observer	DOE
32	Ermelindo R. Bugaoisan, Jr.	Commenter	NGCP
33	Homernico Mari B. Palma	Commenter	NGCP

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 3 of 163

Agenda	Agreements / Action Taken / Action Required
I. Call to Order	The meeting was conducted via Microsoft Teams and was called to order at 9:07 AM by Ms. Concepcion I. Tanglao (Designated Presiding Officer/Independent). Atty. Maila Lourdes G. De Castro (Chairperson/Independent) presided the meeting shortly after.
II. Determination of Quorum	<ul style="list-style-type: none"> <li>15 RCC principal members and 3 alternate members were in attendance.</li> </ul>
III. Presentation and Approval of the Proposed Agenda	<p>The provisional agenda of the meeting was approved and adopted by the body, as amended.</p> <p>The Secretariat requested that the meeting be adjourned at 3:00 PM for them to attend the virtual send-off ceremony for the retirement of Atty. Oscar E. Ala (PEMC President), which the RCC agreed to.</p>
IV. Review and Approval of the Minutes of the 180 <sup>th</sup> RCC Meeting held on 18 June 2021	<p>On the query sent by Ms. Tanglao (Independent) on the draft 179<sup>th</sup> RCC Regular Meeting, Chairperson De Castro clarified that the decision of the RCC was to deny the proposal to delete the “PEM Board” among entities that may be impleaded in WESM disputes under WESM Rules Clause 7.3.1.1, and replace it with the term “Governance Arm” for consistency with how the term is defined under DOE Circular No. 2020-10-0021 (Provisions for the Implementation of Independent Market Operator).</p> <p>Mr. Ricardo G. Gumalal (Distribution) moved to approve the minutes of meeting, which was duly seconded by Ms. Tanglao. The Secretariat's request to affix the e-signature of RCC Members was also approved by the body.</p>
V. Matters Arising from Previous Meeting	
5.1. RCC Resolution No. 2021-08: Revisions to RCC Resolution No. 2019-19 on the Proposed Revisions to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual	<p><u>Presenters:</u> Atty. Ma. Hazel M. Gubaton-Lopez (PEMC)</p> <p><u>Action Requested:</u> For discussion and approval to endorse to PEM Board and affix e-signature</p> <p><u>Meeting Material:</u> Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual</p> <p><u>Proceedings:</u></p>

**MEETING MINUTES**

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 4 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>Atty. Ma. Hazel Gubaton-Lopez (PEMC) presented the difference between the approved RCC version, and the further amendments as instructed by the DOE. Highlights of the discussion are as follows:</p> <p><i>A. WESM Rules</i></p> <ul style="list-style-type: none"> <li>• In Clause 1.8.2, review and approval of the guidelines for the WESM Compliance Officers' (WCO) competency standards and certification program is an additional task on the part of the Compliance Committee for purposes of check and balance in establishing standards and guidelines.</li> <li>• In Chapter 7, the term "designation and accreditation" was changed to "certification and registration" because what is being certified is the individual or the WESM Compliance Officer.</li> <li>• The terms "certification and registration" and "governance arm" were incorporated in the proposal.</li> <li>• In Clause 7.2.9.2, in addition to the enumerated obligations of the WCO, it was added that they need to undergo a certification process as WESM Compliance Officers.</li> </ul> <p><i>B. Proposed New WESM Manual on WESM Compliance Officers Certification and Registration Issue 1.0</i></p> <ul style="list-style-type: none"> <li>• The title was changed from "WESM Compliance Officers (WCO) Accreditation Manual" to "WESM Compliance Officers (WCO) Certification and Registration Manual".</li> <li>• The WCO Accreditation Body was removed as its obligations will instead be performed by the WESM Governance Arm as proposed by the DOE.</li> <li>• The Governance Arm can provide training to the designated WCOs and registered WCOs, and will evaluate the submitted reports by the WCOs, subject to the review of the Compliance Committee. The WESM Members shall be responsible for the registration of their respective WCOs in the WESM.</li> <li>• Compliance period is set every three (3) years. WCOs shall comply with continuing certification requirements after the first compliance period.</li> <li>• The WCO of the Market Operator is proposed to be exempted from the certification program in recognition of MO's expertise in the WESM, but the MO's WCO is not exempted from the registration requirements. The Market Operator may also provide lectures or trainings to the designated and registered WCOs, as currently practiced.</li> </ul>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 5 of 163

Agenda	Agreements / Action Taken / Action Required
	<ul style="list-style-type: none"> <li>• Section 3 was revised to focus on the process of certification, with the following modifications:               <ul style="list-style-type: none"> <li>○ The WCO nomination form was removed from the proposal to give flexibility in detailing the procedure. It will be part of the Governance Arm's internal business process. Also, the person who must undergo the certification process and the definition of the senior management were transferred to this section.</li> <li>○ The credit unit to be completed was changed from 20 to 36 units. The compliance period was also lengthened from one (1) year to three (3) years. It was patterned after the continuing education requirement of the Professional Regulatory Commission (PRC). Before the end of the compliance period, the registered WCO must complete the 36 credit units.</li> <li>○ The thirty (30) days grace period within which to comply with the certification requirements was removed due to the extended compliance period of three (3) years.</li> <li>○ For renewal purposes, the period for compliance assessment and notification by the Governance Arm to the registered WCO was changed from one (1) month to six (6) months before the end of each compliance period. Upon completion of renewal requirements, a Certificate of Registration will be issued indicating the validity period.</li> <li>○ The Governance Arm will issue the certification for those who completed the credit units.</li> <li>○ New provision was added for the Governance Arm to formulate guidelines to effectively facilitate implementation of the Manual.</li> <li>○ There can be several designated WCOs in one entity, but only one will be registered as WCO in the WESM. The other designated WCOs may also continue to renew or comply with the continuing certification requirements. The objective of the certification is to keep the officers updated of the developments in the WESM.</li> <li>○ All WESM Members and the Market Operator must update the registration of their respective registered WCOs.</li> <li>○ Affiliated WESM Members may be allowed to register one (1) WCO to provide flexibility for the registration of more than one (1) WCO as it may happen that the WESM Member may have one or more facilities having different plant types.</li> </ul> </li> </ul>

**MEETING MINUTES**

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 6 of 163

Agenda	Agreements / Action Taken / Action Required
	<ul style="list-style-type: none"> <li>• The classification of WCO as probationary, active, and inactive was removed. To be straightforward, the WESM Compliance Officer is referred to as either registered or designated.</li> <li>• The one (1) year work experience in electricity market operations/trading was removed as the requirement for WCO. It was replaced as someone occupying a senior management position.</li> <li>• During the interim period, the registered WCOs who are not yet certified shall undertake necessary action to comply with the certification requirements.</li> <li>• The pro-rating of credit units required for WCOs who would be designated at the later part of the compliance period was removed since the period for complying with the certification was already extended to three (3) years.</li> <li>• Credit units were changed to consider attendance to trainings rather than the result of the examinations given during the trainings. Consequently, there is no need for the development of test questions and test data banks.</li> <li>• The training topic list provided under Section 6.1 is not an exhaustive list.</li> <li>• Lectures and trainings may also be conducted through online platforms and materials may also be provided via e-mail.</li> <li>• In case of separation of the registered WCO from the WESM Member, the latter shall inform the Governance Arm, from within fifteen (15) days to three (3) working days from such occurrence.</li> <li>• Full or partial certification was removed. The earned credit units as previously earned from previous employment of the WCO must be confirmed by the Governance Arm.</li> <li>• All WESM Members may have a pool of certified WCOs, where it can select its registered WCO. The Market Operator may select the replacement of its registered WCO since it has no pool of certified WCOs.</li> <li>• Non-registration of WCO by a WESM member shall result to the issuance of a Non-Compliance Notice by the Governance Arm and imposition and collection of a non-compliance fee as penalty in such amounts authorized under the WESM Penalty Manual.</li> <li>• The non-compliant registered WCO shall not be authorized to represent his/her respective organization in any case or proceedings pending with the Governance Arm or in matters relating to enforcement and compliance. As a remedy, the</li> </ul>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting

Agenda	Agreements / Action Taken / Action Required
	<p>WESM Member can immediately register another WCO from its pool of certified WCOs.</p> <ul style="list-style-type: none"> <li>• An appendix for the workflow of procedures relating to certification procedure was added.</li> <li>• A transitory provision was added stating that all current registered WCOs in the WESM may remain to be the registered WCOs subject to the provisions set forth in the manual.</li> </ul> <p>Chairperson De Castro asked if the Market Operator will also be receiving trainings from other jurisdictions to comply with the training requirements. Atty. Gubaton-Lopez responded that the Market Operator may consider it in the future, but it is not required of them to have such training. The MO is the other entity, aside from the Governance Arm, which can provide certification training because of their expertise in the field.</p> <p>Ms. Divine Gayle C. Cruz (RCC Secretariat) then presented the contents of the draft resolution for the proposal, which was sent to the RCC on 13 July 2021.</p> <p>Having no further questions, Mr. Francisco L.R. Castro, Jr. (Independent) moved for the approval of the draft RCC resolution and for the affixing of RCC members' e-signature to the resolution, which was duly seconded by Mr. Mark Habana (Generation). The motion was approved and adopted by the body.</p> <p><u>Resolution:</u> The RCC approved to endorse RCC Resolution 2021-08 to the PEM Board.</p>
<p>5.2. Draft RCC Resolution No. 2021-09: Revisions to RCC Resolution No. 2019-04 on the Proposed Amendments to the WESM Rules, Retail Rules and Market Manuals Related to Audit and Performance Monitoring</p>	<p><u>Presenter:</u> Ms. Divine Gayle C. Cruz (RCC Secretariat)</p> <p><u>Action Requested:</u> For approval to affix e-signature and endorsement to PEM Board</p> <p><u>Proceedings:</u>        Ms. Divine Gayle C. Cruz (RCC Secretariat) presented the contents of the draft resolution, which was sent to the RCC on 13 July 2021.</p> <p>Ms. Cruz noted that the significant change to RCC Resolution No. 2019-04 was the frequency for the conduct of periodic audit, worded as:</p>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams

Agenda	Agreements / Action Taken / Action Required
	<p>Having no further comments or questions, Mr. Gumalal moved for the approval of the draft RCC resolution and for the affixing of RCC members' e-signature to the resolution, which was duly seconded by Ms. Lorreto H. Rivera (Supply). The motion was approved and adopted by the body.</p> <p><u>Resolution:</u> The RCC approved RCC Resolution 2021-10.</p>
<p>5.4. Draft RCC Resolution No. 2021-11: Proposed Amendments to the WESM Rules and WESM Registration Manual regarding De-registration and Cessation (ORCP-WR-WM-21-05)</p>	<p><u>Presenter:</u> Ms. Divine Gayle C. Cruz (RCC Secretariat)</p> <p><u>Action Requested:</u> For approval to affix e-signature and endorsement to PEM Board</p> <p><u>Proceedings:</u></p> <p>Ms. Cruz presented the contents of the draft resolution, which was sent to the RCC on 13 July 2021. In the matrix of proposed amendments, she noted that the RCC adopted the proposal as submitted.</p> <p>Having no further comments or questions, Mr. Isidro E. Cacho (Market Operator) moved for the approval of the draft RCC resolution and for the affixing of RCC members' e-signature to the resolution, which was duly seconded by Ms. Rivera. The motion was approved and adopted by the body.</p> <p><u>Resolution:</u> The RCC approved to endorse RCC Resolution 2021-11 to the PEM Board.</p>
<p>5.5. Draft RCC Resolution No. 2021-12: Proposed Revisions to the PEM Board-Approved Amendments to Clarify Bilateral Contracts Accounted for in Settlements (ORCP-WM-20-03A)</p>	<p><u>Presenter:</u> Ms. Divine Gayle C. Cruz (RCC Secretariat)</p> <p><u>Action Requested:</u> For approval to affix e-signature and endorsement to PEM Board</p> <p><u>Proceedings:</u></p> <p>Ms. Cruz presented the contents of the draft resolution, which was sent to the RCC on 13 July 2021.</p> <p>She underscored DOE's concern for remanding the proposal, which in effect categorized a Generation Company as a Supply Customer since there is no existing policy to date that supports the arrangement. Thus,</p>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 10 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>the revision required the submission of a copy of contract for replacement powers between generators. A new term, "Replacement Power Arrangement" was also added to refer to an agreement between two generation companies for the delivery of electricity by the purchasing generation company to its customers when its power plant is on outage.</p> <p>Having no further comments or questions, Ms. Rivera moved for the approval of the draft RCC resolution and for the affixing of RCC members' e-signature to the resolution, which was duly seconded by Mr. Castro, Jr. The motion was approved and adopted by the body.</p> <p><u>Resolution:</u> The RCC approved to endorse RCC Resolution 2021-12 to the PEM Board.</p>
<p>5.6. Proposed General Amendments to WESM Manuals for Improvements to Market Resource Modelling and Monitoring (ORCP-WM-21-04)</p> <ul style="list-style-type: none"> <li>○ Discussion of IEMOP's Revision</li> <li>○ NGCP Comments</li> </ul>	<p><u>Presenters:</u></p> <p>Ms. Divine Gayle C. Cruz (RCC Secretariat)          Ms. Valfia U. Gregorio (IEMOP)          Mr. Ermelindo R. Bugaoisan, Jr. (NGCP)</p> <p><u>Action Requested:</u> For discussion/approval for endorsement to the PEM Board</p> <p><u>Meeting Materials:</u> Annex B - Matrix of Proposed General Amendments to WESM Manuals for Improvements to Market Resource Modelling and Monitoring</p> <p><u>Proceedings:</u></p> <p>Ms. Cruz noted that the submission of comments for the proposal has lapsed last 03 June 2021. The Secretariat received comments from NGCP on 05 July 2021. Thus, she inquired from the RCC if NGCP's comments will still be considered for deliberation considering that it was submitted beyond the deadline.</p> <p>Chairperson De Castro recognized the attendance of Mr. Ermelindo R. Bugaoisan, Jr. and Mr. Homernico Mari B. Palma as representatives of the NGCP. She also stated that she is inclined in giving due course to NGCP's comments and the body confirmed that they are willing to accommodate.</p>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 11 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>Ms. Cruz noted that prior to the meeting, the Secretariat forwarded NGCP's comments to IEMOP, as the proponent, for their response, in preparation for the RCC's discussion.</p> <p>Highlights of the deliberation of comments are as follows:</p> <ul style="list-style-type: none"> <li>On the TC's request for looping example as an input to Section 5.3.2 (Simplifications on the Market Network Model), Mr. Edward I. Olmedo (IEMOP) said that IEMOP will submit the same within the day.</li> <li>On Section 5.10.2, Mr. Bugaoisan, Jr. explained that they wanted a level of acceptability in requiring real-time data considering that monitoring is not always perfect like in forecasting. Ms. Valfia U. Gregorio (IEMOP) responded that IEMOP is agreeable to the comment. However, she noted that the additional proposed language will trigger the development by the MO and the SO of the level of acceptability standards for provision of real-time data, and that the compliance with said standards will require monitoring and/or enforcement for compliance purposes by the Enforcement and Compliance Office (ECO).</li> </ul> <p>Mr. Allan C. Nerves (Independent) clarified if IEMOP is amenable in coming-up with the standard metrics in providing real-time data. Mr. Olmedo answered in the affirmative and said that the same will be formulated together with the SO, similar on how they formulate the Market Operator Performance Standards (MOPS). He also said that they will try to come-up with a benchmark on the level of acceptability.</p> <p>Chairperson De Castro inquired if the metrics for development will delay any process or trigger a submission of another document. Mr. Olmedo replied that it will not in any way delay any process, and it is about time for the development of the said metrics. He also said that the metrics may come in the form of appendix to the Dispatch Protocol Manual, to be submitted to the RCC.</p> <p>In the metrics development, Mr. Ambrocio R. Rosales (System Operator) suggested considering the way forward if after the threshold for the level of acceptability was breached and if the real-time data would still be accepted after the threshold breach. The process for correcting bad data must also be included</p>

**MEETING MINUTES**

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 12 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>considering the five (5) minute interval and the source of bad data, like for instance when the error comes from the generator. He also opined that the five (5) minute trading interval is so compressed to find solutions in case of bad data from the generator. Mr. Bugaoisan, Jr. supported the statement of Mr. Rosales and added that the dilemma of the dispatchers is on the accuracy of real-time data due to data unavailability. The response time to ensure accuracy of the data would be difficult for the SO if the problem is on the side of the plant as there are instances that it takes longer for the plant to correct it. He also expressed his agreement with Mr. Olmedo to indicate the metrics in the Dispatch Protocol Manual.</p> <p>Mr. Olmedo clarified that they envision the metrics to contain indications if they are already deviating from certain standards. If the standards are unmet, it is an indication that they should address something but not necessarily in real-time, as the indicator can be collected over time. He also noted that the concern of NGCP will be included in the escalation process separate from the metrics.</p> <p>Ms. Cruz requested for clarification if the metrics to be developed is not a pre-requisite for the approval to endorse the proposal to the PEM Board. Mr. Olmedo affirmed the understanding of the Secretariat and added that the proposal would become their basis in crafting the metrics, which will be separately submitted as part of the Dispatch Protocol Manual.</p> <p>The body adopted the comment of NGCP.</p> <ul style="list-style-type: none"> <li>On Section 5.10.3, Mr. Bugaoisan, Jr. stated that they are proposing to shorten the time for the Trading Participant (TP) to resolve erroneous data considering that accuracy and availability of data is not only the responsibility of the SO, but of all entities involved. He explained that the SO is only a medium in gathering the data from the plant and it has no control over it especially when the problem is on the plant's Distributed Control System (DCS).</li> </ul> <p>Mr. Carlito C. **MEETING MINUTES**

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 13 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>(RTU) is not the business of the generators. When RTU problem occurs, the generator needs to call for a third party for troubleshooting. In this event, the response time of the SO and the TP are not comparable. He added that the maintenance of real-time monitoring equipment is part of NGCP's business as it is approved by the Energy Regulatory Commission (ERC) to be part of its operating expense. He posited that unless the SO is willing to assist the TP in troubleshooting the RTU, the TP should not be restricted in resolving the erroneous data within seven (7) days.</p> <p>Upon inquiry of the Chairperson, Mr. Claudio proposed that seven (7) to thirty (30) day period would be enough for the TP to resolve the issue.</p> <p>Mr. Bugaoisan, Jr. acknowledged the tripartite responsibility between the MO, SO and TP in providing accurate data. However, if the period for the TP to resolve the erroneous data would be extended, the accuracy level of data produced by SO will also be affected. He also noted that it would be inefficient for the dispatcher to manually input data instead of doing its core function of ensuring the reliability and security of the grid.</p> <p>Mr. Claudio stated that the RTUs owned by the TP does not exceed 5% of the total RTUs as compared to NGCP's ownership, based on his estimate. He also asked if the SO has data on the history of failures to provide accurate data on the part of the TP for them to claim that it would be a dilemma of the dispatchers to manually input the data. Mr. Bugaoisan, Jr. said that they will provide the data citing a TP which took three (3) months to resolve the inaccurate data. He also stated that it would be problematic on the part of the SO to provide accurate data for the five (5) minute dispatch interval.</p> <p>Mr. Claudio reiterated his suggestion for the SO to aid the TP in troubleshooting its RTU for a fee, to which Mr. Bugaoisan, Jr. concurred to be discussed within NGCP. Mr. Rosales emphasized to shorten the period for the TP to correct its data to indicate a sense of urgency.</p> <p>Chairperson De Castro requested Mr. Olmedo to share his insight for an acceptable resolution period. Mr. Olmedo</p>

**MEETING MINUTES**

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07

 Page : 14 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>suggested that the seven (7) day period would be sufficient for the TP to confirm the data to be fixed, and within the thirty (30) day period, the TP should have resolved the problem. Ms. Cherry Javier (Generation) agreed to the suggestion of Mr. Olmedo.</p> <p>Mr. Bugaoisan, Jr. suggested for a maximum of fifteen (15) day period due to the urgency imposed by the five (5) minute dispatch interval. He also noted that the MO is no longer getting data from the SO based on snapshots, it gathers data real-time through the Inter-Control Center Communications Protocol (ICCP). Following the “garbage-in” “garbage out” principle, the use of real-time data of the MO will not be beneficial. The SO will not be able to immediately correct the data fetched by the MO if the resolution time would be longer.</p> <p>Ms. Javier asked if there was also a provision providing for timeline on the part of the SO to correct erroneous data. Mr. Claudio suggested for a seven (7) day period for the SO to correct its data given that it is their RTU is one of their core businesses. Mr. Bugaoisan, Jr. recommended for a fifteen (15) day period both for the SO and TP to resolve the erroneous data. Chairperson De Castro asked for clarification if the fifteen (15) day period is not a separate timeline for the SO and TP, to which Mr. Bugaoisan, Jr. confirmed.</p> <p>The body adopted the fifteen (15) day period for both the SO and TP to resolve erroneous data.</p> <ul style="list-style-type: none"> <li>On Section 6, Mr. Bugaoisan, Jr. emphasized that the data provision to MO is on real-time basis and so, the SO will have no opportunity to correct it instantaneously; hence, their suggestion for the MO to have the responsibility for estimating real-time data as they also have a system tool like the state estimator.</li> </ul> <p>Mr. Claudio expressed his agreement on the response of IEMOP that the SO, being the data owner, should be the one responsible in ensuring the accuracy and quality of data. He posited that the NGCP, which has the state estimator should use it for data accuracy.</p> <p>Mr. Bugaoisan, Jr. clarified that the real-time data no longer pass thru NGCP's state estimator as agreed with IEMOP. Thus, the</p>

Agenda	Agreements / Action Taken / Action Required
	<p>NGCP has no opportunity to correct the data immediately. He also explained that SO is not the data owner but only a medium. The data owner is the data source, which is the TP. He amplified that the MO, being the end-user, should also have the responsibility in ensuring data accuracy.</p> <p>Mr. Olmedo likened the responsibility of providing data to the generation offers, wherein the TP ensures that the capability of their plant and the way that they manage is their sole responsibility as the MO must not tamper the offers that they are providing. He posited that as end-user, their responsibility is only to escalate in the form of reporting, the problem, or issues that they experienced. He added that in terms of the data coming from the market management system (MMS), the MO likewise bears the sole responsibility for its accuracy. Further, Mr. Bugaoisan, Jr. stated that he agrees with Mr. Olmedo on the point that data should not be tampered, and in the case of NGCP, it cannot also override the erroneous data provided to them by the TP.</p> <p>Mr. Rosales emphasized that the MO fetches the data directly and in real-time from the field. This data does not pass thru the NGCP's state estimator. Thus, it is important to ensure that a threshold for the level of accuracy must be set before providing a Real-Time Dispatch (RTD) solution. He also stated that he believes that the MO has its own state estimator as it just upgraded its system. This state estimator can detect breach in the threshold and can provide estimated value for the continuing run of RTD solution. Moreover, he explained that the NGCP uses its state estimator for them to be guided in contingency cases where there is N-1 disturbance in real-time. The SO runs its power applications like load flow and dynamics and contingency analysis as well to be guided on the estimated value.</p> <p>Mr. Olmedo responded that the MO opted to use real-time data instead of the state estimator as the latter is currently being developed and would also require provisions of complete data set from the SO. He expounded that based on their discussion with the NMMS vendor, for the MO to have a fully functioning state estimator, data beyond the megawatt and megavar analog values is needed, which is currently not present. Mr. Rosales agreed with the statement of Mr. Olmedo that to run the state estimator, the true model of the system must be modelled. He stated that the SO data and of the generators have already been</p>

Agenda	Agreements / Action Taken / Action Required
	<p>modeled. The missing model is that of the distribution network, especially those large distribution utilities. These missing distribution network models pose challenge in running the state estimator, which makes it unable to produce the nearest state of the real-time system. This also results to a huge difference in the output of the solution. He also posited that MO's state estimator must be used as it is included in the new system bought for the market.</p> <p>Mr. Gumalal asked if the MO is currently using erroneous data in instances where the TP is providing erroneous data and the fact that NGCP could no longer correct it being a real-time data fetched by the MO. Mr. Bugaoisan, Jr. answered that in the given case, manual inputting is being done by the dispatcher. If this happens in the five (5) minute interval, it would be burdensome for the dispatcher. Further, Mr. Gumalal inquired if manual inputting can be realistically done under the five (5) minute interval to which Mr. Bugaoisan, Jr. responded to be their major concern. Mr. Gumalal opined that if this scenario happens, it would be prudent to use temporarily the MO's state estimator and ultimately fix the problematic RTUs. Mr. Bugaoisan, Jr. agreed to the opinion of Mr. Gumalal and continued that is their proposal for the MO to make its state estimator functional.</p> <p>In addition, Mr. Rosales illustrated the steps undertaken by the dispatcher during the manual encoding. He said that the dispatcher will use the SCADA system and update every single generator every five (5) minutes. The encoding for one generating unit takes time and before it is done, another interval has already lapsed. In the end, the SO will be blamed for the erroneous data for the five (5) minute interval. He said that they were able to perform manual encoding in the hourly interval, but it would be difficult for them to do same in the five (5) minute interval. Therefore, the tripartite resolution is important in this case to resolve the data inaccuracy.</p> <p>Mr. Claudio commented that the data provided should be acceptable to MDOM on the side of the MO since this is the rationale for removing the gate closure. He also opined that this problem happens only if the SO and the MO are separate entities, and that state estimation happens in the SO side and not</p>

	<p>in the MO side in other electricity markets like California Independent System Operator (CAISO).</p> <p>Mr. Ryan Morales (Distribution) asked about the frequency of occurrence of this error, and who will be responsible for estimating errors. He opined that the latter is crucial because it involves payment. Also, he suggested agreeing on a formula like averaging or similar estimation if the occurrence of this error is seldom instead of using the complicated tool of state estimator. In this suggestion, he explained that there is no need for either party to take responsibility on who should perform state estimation.</p> <p>Mr. Rosales added that the MO can use the day-ahead data for scheduled generation to come-up with an RTD schedule. In this case, there would be no need for the SO to manually input the data, and for the MO to run the state estimator. He also agreed with the suggestion of Mr. Morales to use metering data in settlement.</p> <p>Mr. Olmedo opined that the suggestions are only applicable for loads. He elucidated that the provision is about real-time data scheduling and realistic dispatch implementation. He also stated that the MO does not use real-time data but revenue meter data in settlement. The real-time data is used to project if the generator is capable to arrive at a certain interval given their offer and ramp limitations. Aside from this, there are also breaker statuses, which provide for the power system topology to come-up with a more accurate RTD. In other words, the MO does not use analog data alone. He emphasized that IEMOP's comment aims that the efforts of all entities, including the network service providers be gathered to attain a higher level of accuracy. For less accurate data, the earlier suggestions may be employed, but the main objective of the original provision is to get the more accurate data.</p> <p>Considering the disagreement between the MO and SO, Chairperson De Castro inquired from the body if the discussion on the provision be deferred until such time that the MO and SO has come to an agreement after their separate discussion. The body interposed no objection to the deferment.</p>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 18 of 163

Agenda	Agreements / Action Taken / Action Required
	<ul style="list-style-type: none"> <li>On Section 6.1.1, Mr. Bugaoisan, Jr. explained that they wanted other types of market resources such as flywheel and hybrid systems, be included in the modelling of Battery Energy Storage System and Pumped Storage System. Mr. Olmedo responded that the inclusion of those is not necessary since these are not included in the WESM Rules. However, these resources may be included as soon as they are introduced in the WESM Rules, as provisions on how these resources should be treated must be first established.</li> </ul> <p>The body adopted to retain IEMOP's proposal.</p> <ul style="list-style-type: none"> <li>On Section 6.4.5, Mr. Bugaoisan, Jr. stated that their comment is for the consistent monitoring of net generation of the plant as there are discrepancies monitored with SO's model. In response, Mr. Olmedo explained that the Market Trading Node (MTN) was redefined back in 2018 or 2019, such that it is the location where the revenue meter is located. Previously, MTN had been synonymous with market resource where scheduling occurs. To delineate the location of the revenue meter, it is the MTN that is located in the asset boundary. The scheduling point is the location where the market resource is being modelled. He continued that the objective of the proposal is for clarity since there are generators registering based on their gross capability or output net of station use that is being certified by the ERC. Upon registration to commercial operations, it is cleared if the monitoring to be used is based on the gross output of the generator or output net of station use. These are communicated to SO for purposes of monitoring and to PEMC-Enforcement and Compliance (ECO). Each generating unit's declared capability must be consistent from registration up to scheduling and pricing. Considering the definitions, the process of execution with the SO is not uniform as it is dependent upon the value in the generator's COC being approved by the regulator, whether it is gross capability or output net of station use.</li> </ul> <p>Mr. Bugaoisan, Jr. inquired if there were efforts to make the declarations in the generator's Certificate of Compliance (COC) uniform. Mr. Olmedo replied that the matter had already been escalated to the ERC in 2019 and 2020, and they will again manifest their intention to make it uniform for all generating units.</p>

	<ul style="list-style-type: none"> <li>Section 3.2.3, the newly introduced provision of IEMOP was adopted.</li> </ul> <p>Having no further comments or questions, Mr. Castro Jr. moved for the approval of the proposal, as amended, which was duly seconded by Mr. Rosales. The motion was approved and adopted by the body.</p> <p><u>Resolution:</u></p> <p>The RCC approved the proposal, as amended. The looping example requested will be submitted by IEMOP within the day and the corresponding resolution to be endorsed to the PEM Board shall be reviewed for approval by the body in the next meeting.</p> <p>The meeting temporarily adjourned at 12:10 PM and was called to order again at 12:50 PM by Mr. Castro as the Presiding Officer.</p>
<p>5.7. Proposed General Amendments to the WESM Rules and WESM Manuals regarding Market Operator and System Operator Procedures (ORCP-WR-WM-21-07)</p>	<p><u>Presenters (IEMOP-proponent):</u>          Mr. Edward I. Olmedo          Ms. Valfia U. Gregorio</p> <p><u>Action Requested:</u> For discussion and approval to endorse to the PEM Board</p> <p><u>Meeting Materials:</u> Annex C - Matrix of Proposed General Amendments to the WESM Rules and WESM Manuals regarding Market Operator and System Operator Procedures</p> <p><u>Proceedings:</u></p> <p>Ms. Cruz introduced the invited representatives of the entities that submitted comments to the proposal. These entities are the Aboitiz Power Corporation (APC), SPC Power Corporation (SPC), and Technical Committee (TC). Mr. Castro acknowledged the virtual attendance of the guests and then asked for the background and objectives of the proposal before the line-by-line review of the proposal matrix. Ms. Cruz stated that the proposal has been the subject of an urgent amendment for the implementation of the enhanced WESM design and operations, which was approved by the PEM Board on 31 March 2021. The proposal is the result of IEMOP's trial operations for the launching of the enhanced WESM design.</p>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 20 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>Highlights of the deliberation are as follows:</p> <ul style="list-style-type: none"> <li>• <i>WESM Rules</i> <ul style="list-style-type: none"> <li>○ On Section 3.8.2, Mr. Rosales commented that the dispatch instructions report covers all the instructions of the System Operator not only for monitoring purposes of non-compliance. He noted that the dispatch deviation report also includes the dispatch instruction. He opined that dispatch instruction report is generic and it is not related to what is needed and could be overwhelming on the part of the recipient. Thus, he is proposing to retain the term “dispatch deviation report”.</li> </ul> </li> </ul> <p>Mr. Olmedo explained that the proposal was drafted before the transition to the five (5) minute operations and it was agreed with the SO to do away with the deviation report because the responsibility to report the issues to PEMC-ECO should be the responsibility of that plant. He also stated that the content of the dispatch instruction report as proposed specifically includes ancillary services, Merit Order (MOT), and Must-Run Unit (MRU). Mr. Rosales asked if the report is currently submitted as proposed, to which Mr. Olmedo confirmed.</p> <p>The body approved the provision as proposed.</p> <ul style="list-style-type: none"> <li>○ On APC’s comment in Section 3.8.3.4, Mr. Claudio commented that Contingency Reserves (CR) and Dispatchable Reserves (DR) are not frequency regulation services. CR is used for contingency events whenever a plant trips to arrest the frequency declines and to stabilize the frequency to a level where the Regulating Reserves (RR) takes over and restore the frequency to a nominal value of 60 Hz. Therefore, CR is not used for RR service. When a contingency happens and the required CR is no longer available, it can result to automatic load dropping and, in worst case, to system blackout. Hence, CR should not be used for regulation service. If there is mismatch in load and generation in real-time, the first to be used is RR, and if the RR is depleted, the MOT is next to be used and MRU as the last. Mr. Rosales concurred to the explanation of Mr. Claudio and opined that TPs have the responsibility to reflect immediately their capacity changes to address the event in the next dispatch interval and that the frequency regulation reserve should not be exhausted.</li> </ul>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 21 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>Mr. Richard O. Arcenal (SPC) stated that based on their understanding and as stated in the Grid Code, MRU is only used after exhaustion of the reserves. Since SO contracts for reserves, then those reserves are used before the MRU.</p> <p>Mr. Claudio clarified that the reserve to be depleted is only the regulating reserve. The CR and DR should not be depleted to correct a small frequency deviation in real time. It is only used for purposes as earlier mentioned. Mr. Olmedo agreed with the statement of Mr. Claudio and Mr. Rosales.</p> <p>Adding to the discussion, Mr. Rosales opined that to accommodate the must-dispatch unit, adjustment should be made in the MOT and not in the frequency regulation. While frequency regulation is dynamic and it automatically responds, it should not be allowed in the manual for the regulation reserves to be exhausted before doing the next steps. He illustrated that if the must-dispatch unit has a 50MW generation deviation, a generator in the MOT should be constrained also by 50MW and need not exhaust the ancillary reserve. This scenario results to an event where the ancillary reserve is being paid and at the same time the excess generation is being accommodated, which results to double payment. Thus, he suggested to replace the frequency regulation to MOT.</p> <p>Mr. Claudio disagreed to the suggestion of Mr. Rosales and posited that the regulation reserve should be first used before the MOT since regulation reserve providers are paid to regulate system frequency to address the mismatches in generation and load when there is a sudden increase or decrease in the generation due to in the entry or exit of must-dispatch generation. When the regulation reserve is at zero (0) should be the correct event when to resort to MOT since generators on MOT are not paid for regulating system frequency, which is the function of the regulation reserve provider.</p> <p>Mr. Rosales disagreed to the statement of Mr. Claudio clarifying that the regulation reserve has other uses like power quality and maintenance of frequency, which is also being paid for by the consumers. He opined that the exhaustion of regulating reserves is only made to accommodate the must-dispatch units, which</p>

Agenda	Agreements / Action Taken / Action Required
	<p>defeats the other purposes of regulation reserves. He reiterated his suggestion that the frequency regulation is the first to respond to the deviation to be followed by the issuance of dispatch instruction in reference to the MOT, so that the generator would be aware of the reason that they are being constrained-off to accommodate the must-dispatch. He also added that the provision should be clear that the frequency regulation should not be exhausted because to do so would sacrifice the power quality of the grid.</p> <p>Mr. Olmedo clarified that their proposal is just to clarify the term in terms of the type of reserve as used in the relevant DOE Department Circular. If the provision will be reworded such that the frequency regulation should not be exhausted, it will be inconsistent with the DOE DC directing for the exhaustion of ancillary reserves. Mr. Rosales inquired if the subject DOE DC refers to must-dispatch unit or to MRU. Mr. Olmedo responded that the DOE DC is applicable to all types of generators. He also suggested that the provision be reworded subject to the concurrence of all parties.</p> <p>The body agreed to defer the discussion of the provision to next meeting.</p> <ul style="list-style-type: none"> <li>• <i>WESM Manual on Dispatch Protocol Issue 13.2</i> <ul style="list-style-type: none"> <li>○ On Section 2.1.2 (Definition of Terms), Mr. Rosales sought for clarification and confirmation if the terms are correspondingly replaced as follows:               <ul style="list-style-type: none"> <li>○ Primary Reserve to Contingency Reserve</li> <li>○ Secondary Reserve to Regulating Reserve</li> <li>○ Tertiary Reserve to Dispatchable Reserve</li> </ul> </li> </ul> </li> </ul> <p>Mr. Olmedo confirmed the corresponding replacement terms and stated that it was based on DOE DC 2019-12-0018.</p> <p>On the Automatic Generation Control (AGC), Mr. Olmedo explained that they have two (2) options for the use of AGC. First is to respond to a changing system frequency or to meet the target loading level since it is being proposed that the generator can opt to interface with the SO using AGC for energy and re-dispatch. Mr. Rosales agreed with the definition of IEMOP as explained by Mr. Olmedo.</p>

## MEETING MINUTES

Subject/Purpose : 181<sup>st</sup> Rules Change Committee Meeting  
 Date & Time : 16 July 2021, 09:07  
 Venue : Online via Microsoft Teams  
 Page : 23 of 163

Agenda	Agreements / Action Taken / Action Required
	<p>Mr. Virgilio Fortich, Jr. inquired if the “control” in AGC is a device subject to calibration. Mr. Rosales answered in the affirmative and said that it is being tested regularly to determine if it needs to undergo fine-tuning.</p> <p>The body adopted IEMOP’s proposal.</p> <ul style="list-style-type: none"> <li>○ On Section 7.10.2, Mr. Olmedo explained that the proposed wording came from SO because of their internal audit.</li> <li>○ On Section 11.1.3, Mr. Rosales asked if there will be a need to issue a dispatch instruction from SO if the generating unit is operating on Automatic Generation Control (AGC) considering the 5-minute interval where the SO will have no opportunity to make calls to the TP. Mr. Olmedo clarified that if the command is coming from the SO or its facilities, it is termed as dispatch instruction. It is further detailed in the proposed Section 11.1.4 that the TP shall comply with the dispatch instructions issued by the SO through their facilities for AGC, based on the dispatch target determined by the MO for each dispatch interval. Mr. Rosales opined that the provision is not clear since there should be no dispatch instruction for AGC due to its automation. Mr. Olmedo explained that in other jurisdiction that they have looked into, generators on AGC still has to follow certain set of compliance despite automation because they have to maintain the facility on their end so that they would be able to comply with the commands sent to them.</li> </ul> <p>Mr. Rosales said that the wordings of Section 11.1.3 can be interpreted that SO will not provide a dispatch instruction for AGC. However, in Section 11.1.4, it requires the SO to issue dispatch instructions for compliance of TP, which is contrary to Section 11.1.3. Therefore, he opined that original Section 11.1.3 be retained and no longer include the new Section 11.1.4. He also suggested that the provision be revisited later since there is no generating unit yet on AGC, which Mr. Olmedo assented to.</p> <p>The body agreed to retain the original provision of Section 11.1.3 and not to adopt the new Section 11.1.4.</p>

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
		3.1 The accreditation is mandatory for all WCO as registered or nominated by the WESM Member. It is, however, optional, for WESM Enforcement Officers (WEO) and other officers who are directly or indirectly involved in the compliance-related activities of the company, including enforcement personnel under probation or apprenticeship with the company.	<p><b><u>3.1 Certification</u></b></p> <p><b><u>3.1.1 The certification is mandatory for all individuals duly designated as WCO/s by the WESM Members. The WCO Certification shall be granted by the WESM Governance Arm to the designated WCO/s by the WESM Member after satisfying and completing the relevant lecture or training requirements in accordance with the WCO certification program adopted by the WESM Governance Arm.</u></b></p>	<p>The re-arrangement in the order or sequence of sections; and the revisions/changes or rewording in some of these provisions were made during the PEMC-DOE meetings/ workshops in August and October 2020.</p> <p>These provide further details on the certification and registration processes which combined the original Sections 3 and 4.</p> <p>Clerical edit (remove repetitive words)</p> <p>Note: the term WEOs is removed as they are covered by the term "Designated WCOs"</p>
		3.2 In strict compliance with Clause 7.2.9 of the WESM Rules, each WESM Member, the Market Operator, the System Operator, Metering Service Provider and any other WESM Service Provider shall designate a WCO in their respective organizations. The aforesaid entities shall update the registration of their respective WCO in PEMC on or before the commencement of the compliance period as referred to in Section 5 hereof, and whenever there is a change in the WCO.		Transferred to 3.2.3 but reworded for clarity.

## Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
		Failure to comply with Clause 7.2.9 of the WESM Rules shall be dealt strictly by the WCO Accreditation Body.		
		3.3 A WCO nomination form shall, for this purpose, be developed by the WCO Accreditation Body which shall be used by the concerned entities in updating the registration referred to in the preceding section.	<del>3.3—A WCO nomination form shall, for this purpose, be developed by the WCO Accreditation Body which shall be used by the concerned entities in updating the registration referred to in the preceding section.</del>	Removed.  This detailed procedure may be covered by the internal business process of the Governance Arm.
			<u>3.1.2. The WESM Members shall designate individual/s occupying senior management position such as those pertaining, but not limited, to legal, risk management, regulatory or compliance, to undergo certification program.</u>  <u>For this purpose, senior management shall refer to a position in the company which carries with it the authority, capability, and responsibility to plan and direct the work of individuals or group of individuals, or make key decisions in an organization, either through employment or consultancy engagement or agreement.</u>	Transferred from Section 4.1 but reworded for clarity.  Transferred from Section 4.1. No change in the definition of senior management

## Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
			<u>3.1.3. Each designated WCO/s by the WESM Member must complete at least thirty-six (36) credit units of compliance lecture series or trainings. prior issued with a WCO certification.</u>	Transferred from Section 4.4 but reworded. From 20 credit units to 36 credit units.  Clerical edit.
			<u>3.1.4 Upon conclusion of a lecture or training, the WESM Governance Arm or the Market Operator shall issue a Certificate of Completion to the designated WCO/s by the WESM Member identifying the time, date, location, subject matter and length of the activity and the number of credit units earned.</u>	Transferred from Section 8.1 but reworded for clarity and consistency of the terminologies used in the Manual.
			<u>3.1.5. The WESM Governance Arm shall maintain a database containing the list of all Certified WCOs, and Registered WCOs. Similarly, the training courses attended, and credit units earned shall also be reflected in the said database. The contents of the database shall be updated on a regular basis and indicate the compliance status of each WCO.</u>	Transferred from Section 8.2 but reworded for clarity.  Clerical edit
			<u>3.1.6. The WESM Governance Arm shall, for this purpose, formulate the guidelines to effectively facilitate the information exchange and update the information of the Certified WCOs, and Registered WCOs.</u>	Added - For the Governance Arm to develop more detailed internal business process for the effective implementation of the provisions of this Manual.

## Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
			<u>3.1.7. Certified WCOs who were not selected by their company as a Registered WCO in the WESM may undertake the certification program again for renewal purposes of their WCO Certification. In this regard, these Certified WCOs can be selected by their companies to be the latter's new Registered WCO for instances provided in Section 7 hereof.</u>	Added - For continuing certification
			<u>3.2 Registration</u>  <u>3.2.1 In strict compliance with Clause 7.2.9 of the WESM Rules, all WESM Members, and the Market Operator shall register their respective WCOs in <del>their respective organizations to the WESM</del> through the Governance Arm.</u>	<p>These revisions/changes were made during the PEMC-DOE meetings/workshops in August and October 2020.</p> <p>Clerical edits for clarity.</p>
			<u>3.2.2 Only the Market Operator can register a WCO without undergoing a certification program as it has already the expertise in the WESM, and also responsible in providing training and lecture courses for the designated WCOs of the WESM Members. However, the registered WCO by the Market Operator shall also occupy senior management position such as those pertaining, but not limited, to legal, risk management, regulatory or compliance.</u>	WCO of the Market Operator is proposed to be exempted from the certification program in recognition of its expertise in the WESM. However, he/she is also responsible to perform the functions and obligations of WCO as provided in the WESM Rules and Manual. Also, he/she must have the same qualifications as provided in Section 3.1.2 of the proposed Manual.

## Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
			<u>Likewise, senior management shall refer to a position in the company which carries with it the authority, capability, and responsibility to plan and direct the work of individuals or group of individuals, or make key decisions in an organization, either through employment or consultancy engagement or agreement.</u>	Same definition of senior management.
			<u>3.2.3 All WESM Members and the Market Operator shall update the registration of their respective Registered WCOs to the WESM Governance Arm within the compliance period referred to in Section 4 of this Manual. Failure to comply with Clause 7.2.9 of the WESM Rules shall be subject to sanctions pursuant to Section 7.2.5.2 of the WESM Rules.</u>	Transferred from Section 3.2 but reworded for clarity.  With the extended compliance period and the inclusion of a transitory provision, the WCOs are afforded adequate time to comply with the rules. This would warrant the removal of the provisions regarding the partial compliance with the certification rules, and the classification of “active,” “inactive,” and “probationary” WCOs; rather, a more clear-cut provision in terms of compliance with the certification and registration

## Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
				requirements by subjecting the non-compliant WCOs or the WESM Members to a penalty.
			<p><u>3.2.4. Affiliated WESM Members shall may be allowed to register one (1) WCO to represent them in the WESM provided that the representation is limited under one (1) company name.</u></p> <p><u>For instance, there can be one CertifiedRegistered WCO for the National Grid Corporation of the Philippines even if it functions as the System Operator, Metering Services Provider, and Network Services Provider, and so on.</u></p>	<p>As proposed by DOE.</p> <p>PEMC: Suggest changing shall to <b>may</b> to afford the WESM Members the opportunity to register different WCOs for each WESM Member for justifiable reason. (e.g. for different types of power plant belonging to the different but affiliated WESM Members - there may be a need for a dedicated WCO depending on the set of obligations under the rules)</p>
			<u>3.2.5. Prior the end of the compliance period referred in Section 4 hereof, the Registered WCO shall ensure that he/she complies with the required credit units specified in Section 3.2.6 hereof in order to represent its company in the next compliance period.</u>	Added - For continuing certification and registration requirement
			<u>3.2.6. The Registered WCOs shall complete at least thirty-six (36) units of Certification activities within the</u>	Added - For continuing certification and registration requirement

## Annex A – Matrix of Further Amendments to the WESM Rules and New WESM Compliance Officers (WCO) Accreditation and Certification Manual

Title	Section	Provision on RCC Resolution 2019-19	Proposed Further Amendments (2021 Version)	Rationale
			<u>three year period allotted for the completion of the required units.</u>	
			<u>3.2.7. For renewal purposes, within six (6) months before the end of each Compliance Period, the WESM Governance Arm shall assess the compliance status of all Registered WCOs. Within the same period, the concerned Registered WCOs shall be notified by the WESM Governance Arm of the deficiency, if any, for completion of the requirements.</u>	Transferred from Section 8.3 with modification on the period: From one (1) month to 6 months.  To be performed by the Governance Arm (instead of WCO Accreditation Body).
			<u>3.2.8. The Registered WCO applying for renewal who meets all the requirements set forth herein shall be issued a renewed Certificate of Registration. The Certificate of Registration shall also indicate the validity period.</u>	Added - For continuing certification and registration requirement
MINIMUM QUALIFICATIONS AND REQUIREMENTS FOR WCO ACCREDITATION	4			The provisions are transferred to Section 3 of the Manual (see above)
		4.1 The WCO should occupy a senior management position such as those pertaining, but not limited, to legal, risk management, regulatory or compliance.  For this purpose, senior management shall refer to a position in the company which carries with it the authority, capability, and responsibility to plan and direct the work of individuals or group		Transferred to 3.1.2. but reworded

## BACKGROUND

- Submitted as an Urgent Amendment on 16 April 2021
- RCC Approval on 23 April 2021
- PEMB Approval on 28 April 2021

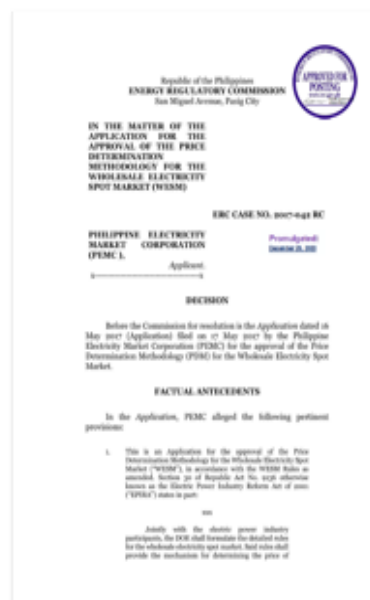

# SUMMARY OF THE PROPOSAL

## BACKGROUND

ERC Decision on the approval of the Price Determination Methodology (PDM) for the enhanced WESM design require revisions to the following WESM manuals:

- 1) Dispatch Protocol – *included in previous urgent amendment*
- 2) Billing and Settlement

8

## SUMMARY OF THE PROPOSAL

CHANGES TO THE BILLING AND SETTLEMENT MANUAL WOULD AFFECT THE ADDITIONAL COMPENSATION PROCESS:

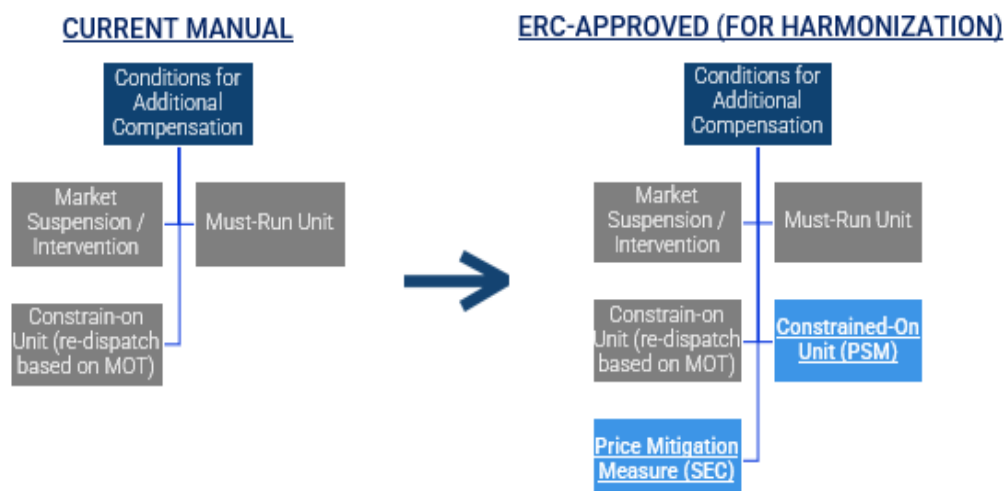

All additional compensation processes are affected by the procedures added by the Energy Regulatory Commission (ERC) in its decision approving the Price Determination Methodology for the enhanced WESM design and operations

09

## SUMMARY OF THE PROPOSAL

### A) Conditions for Additional Compensation

MOT – Merit Order Table  
PSM – Price Substitution Methodology  
SEC – Secondary Price Cap

## SUMMARY OF THE PROPOSAL

### B) Claiming and Approving Additional Compensation

	<u>CURRENT MANUAL</u>	<u>ERC-APPROVED (FOR HARMONIZATION)</u>
<b>DEADLINE FOR FILING OF CLAIM</b>	AP: 14 working days (WD) after resumption MRU, MOT: 1 year after designation	AP, <u>PSM, SEC</u> : 14 WD after resumption/designation MRU, MOT: 1 year after designation
<b>DEADLINE FOR SUBMITTING SUPPORTING DOCUMENTS</b>	None	 <u>60 calendar days (CD) after claim</u>
<b>DEADLINE FOR APPROVAL</b>	AP, MRU, MOT: 14 WD after receipt of complete documents	AP, MRU, MOT, <u>PSM</u> : 14 WD after receipt of complete documents <u>SEC: 30 CD after claim</u>
<b>EFFECT OF INACTION</b>	Deemed approved	Deemed <u>disapproved – GenCo may raise dispute</u>

AP – Administered Price  
MRU – Must-Run Unit  
MOT – Merit Order Table  
PSM – Price Substitution Methodology  
SEC – Secondary Price Cap

## SUMMARY OF THE PROPOSAL

### C) Supporting Documents for Claiming Additional Compensation

<u>CURRENT MANUAL</u>	<u>ERC-APPROVED (FOR HARMONIZATION)</u>
<ol style="list-style-type: none"> <li>1) Certified correct Fuel Consumption and Inventory Report;</li> <li>2) Purchase Invoices, Official Receipts and other supporting documents; and</li> <li>3) ERC approved rate or List of Variable Operation and Maintenance Costs supported by photocopies of invoices/receipts.</li> </ol>	<ol style="list-style-type: none"> <li>1) Certified correct Fuel Consumption and Inventory Report (<u>MRU, AP, MOT</u>); or <u>actual fuel consumption and inventory report, duly certified by the Vice President of Finance of the power plant applying for additional compensation (SEC, PSM)</u></li> <li>2) Purchase Invoices, Official Receipts and other supporting documents; and</li> <li>3) ERC approved rate or List of Variable Operation and Maintenance Costs supported by photocopies of invoices/receipts.</li> </ol>

AP – Administered Price  
MRU – Must-Run Unit  
MOT – Merit Order Table  
PSM – Price Substitution Methodology  
SEC – Secondary Price Cap

8

## SUMMARY OF THE PROPOSAL

### D) Quantity Eligible for Additional Compensation

FEATURE	SEC	AP	PSM	MOT
ADDITIONAL COMPENSATION QUANTITY	If $[GESQ] > [SG + \text{Deviation}]$ , <b>SG</b> – BCQ – ASIE otherwise, <b>GESQ</b> – BCQ – ASIE			
ACTUAL GENERATION	GESQ			
SCHEDULED GENERATION (SG)	Equivalent energy of linear compliance to RTD or SO instruction	Equivalent energy of linear compliance to most recent RTD or SO instruction	Equivalent energy of linear compliance to RTD or SO instruction	Equivalent energy of linear compliance to SO instruction
SO INFORMATION	Dispatch Interval, Target MW			
DEVIATION REFERENCE	Dispatch Instruction Report			
ELIGIBLE TRADING PARTICIPANTS	Oil-based plants	All	Constrained-on plants	All

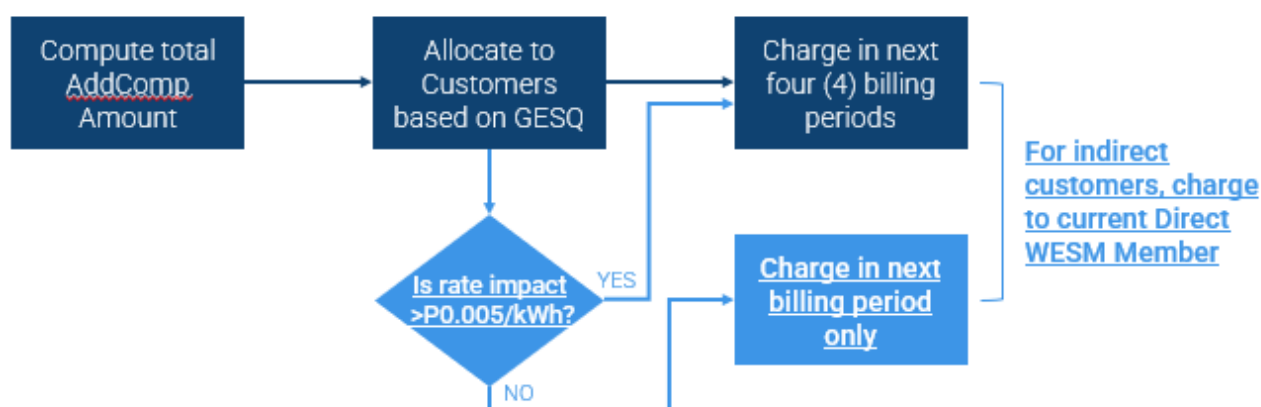

SEC – Secondary Price Cap  
AP – Administered Price

SG – Scheduled Generation  
BCQ – Bilateral Contract Quantity

013

## SUMMARY OF THE PROPOSAL

### E) Cost Recovery of Additional Compensation

8

## OTHER RELEVANT MATTERS

- None

## ACTION REQUESTED

- For approval to publish for comments
