

MONTHLY RETAIL MARKET STATISTICS

June 2026

(26 May 2026 to 25 June 2026)

Document Information Classification: Public

The information contained in this document is based on data that are subject to continuous verification by the Philippine Electricity Market Corporation (PEMC). The same information is subject to change as updated figures come in.

CREM

AT A GLANCE

26 May 2026 - 25 June 2026

Total No. of Registered CEUs

2,820

2.29% increase

Total Energy Consumption of CEUs

2,310 GWh

4.14% increase

Market Structure per Major Participant Group Based on No. of End-User (Concentration - HHI)

Moderately Concentrated

Previous Month: Moderately Concentrated

CEUs Load Factor

80.52%

0.75% increase

Number of Newly Registered CEUs

63

Previous Month: 46

CEU Consumption Share of Total End-User Demand

21.24%

Combined Market Share of Top Three Major Participant Group*

61.9%

1.45% decrease

Spot Exposure Level

11.43%

12.68% increase

Total No. of Customer Switches

16

Previous Month: 10

No. of Ceased CEUs

0

Previous Month: 0

CREM Weighted Average Price (WAP)

PHP 5.41/kWh

Based on the latest available data from the ERC (April 2026 Report dated 11 June 2026)

*The sum of the market shares of the top three groups/suppliers, based on the number of CCs, is used to measure the market concentration and assess how much of the market is held by the leading groups/suppliers within the program. A higher value indicates greater concentration.

Top 3 group/suppliers:

- MERALCO Group
- Aboitiz Group
- First Gen Group

Estimated Savings

PHP 3,914.73 Million***

***based on the difference between the WARGR of RESs and the average generation rate of the top five DUs by CREM consumption for the period excluding the NGCP.

RETAIL AGGREGATION PROGRAM (RAP)**

Total Energy Consumption of RAGs

91.92 GWh

Previous Month: 76.11 GWh

Total No. of Registered RAG

247

Previous Month: 192

**Statistics from the RAP have been integrated into the figures and values shown in the CREM.

Regular Switch - Commercial transfer of a CEU from one Supplier to another.
Projected Switch - CEUs with projected contract expiration during the billing period based on the monthly IEMOP GEOP Summary Report

RETAIL MARKET

GLOSSARY OF TERMS

Philippine Electricity
Market Corporation

AGGREGATED GROUP

End-users whose demand have been consolidated and supplied by a Retail Supplier to qualify for contestability under current rules issued by the Department of Energy (DOE) and the ERC.

CAPTIVE MARKET

The electricity End-users who do not have the choice of supplier of electricity, as may be determined by the ERC in accordance with the EPIRA.

CREM END-USER (CEU)

An electricity end-user who has a choice of supplier of electricity, as may be determined by the ERC in accordance with Republic Act No. 9136.

DIRECTLY CONNECTED CUSTOMER

An industrial or bulk electricity end-user, that is supplied through the Grid or sub-transmission assets owned by the TransCo.

FOUR-FIRM CONCENTRATION INDEX (C4)

It measures the percentage of market share of the four largest firms in the market. Concentration levels are as follows: High: 80% to 100%; Medium: 50% to 80%; and Low: 0% to 50%.

GEOP END-USER (GEU)

Any person or any entity requiring the supply and delivery of electricity sourcing one hundred percent (100%) of its electricity requirements from RE resources for its own use.

HERFINDAHL-HIRSCHMAN INDEX (HHI)

A measure of market concentration calculated as the sum of the squares of the market shares of all firms in a market. The HHI ranges from close to zero (many small firms) to 10,000 (a single firm with 100% market share). Under the 2023 U.S. Department of Justice and Federal Trade Commission Merger Guidelines, markets with an HHI above 1,800 are highly concentrated. An increase of more than 100 points is viewed as significant increase and may indicate that a merger could substantially lessen competition or create a monopoly. Earlier guidelines (1982-2010) classified markets with HHI between 1,000 and 1,800 as “moderately concentrated” and above 1,800 as “highly concentrated”, using the same 100-point increase threshold for significance.

LOCAL RETAIL ELECTRICITY SUPPLIERS (LRES)

The non-regulated business segment of the DU catering to the Retail Market only within its Franchise Area.

RETAIL MARKET GLOSSARY OF TERMS

Philippine Electricity
Market Corporation

PROJECTED SWITCH

Contestable Customers with projected contract expiration during the billing period.

REGULAR SWITCH

The commercial transfer of a Retail Customer from a Retail Supplier to another Retail Supplier.

RENEWABLE ENERGY SUPPLIER (RE SUPPLIER)

Individuals or juridical entities created, registered, or authorized to operate in the Philippines in accordance with existing laws and engaged in the provision or supply of electric power from RE resources to End-user, duly issued operating permits by the DOE.
